MEDICO-CHIRURGICAL HOSPITAL

PHILADELPHIA

1912-1913

The Medico-Chirurgical Hospital is non-sectarian. It is open day and night for the reception of the sick and injured.

The Free Dispensary service is open daily, except Sunday, New Building, 1724 Cherry Street.

The Maternity Department, situated at the northeast corner of Eighteenth and Cherry Streets, receives free of charge poor women who are in need of care at the time of their confinement.

The Children's Department, situated at the northeast corner of Eighteenth and Cherry Streets, is devoted exclusively to the treatment of poor children suffering from disease or deformity.

LABORATORIES

CLINICAL MEDICINE

Under the direction of JAMES M. ANDERS, M.D.

Director

WARREN C. BATROFF, M.D.

Chief Assistant

H. LEON JAMESON, M.D.

Assistants

ROBERT WALKER, M.D.

C. G. STEINMETZ, M.D.

The Laboratory of Clinical Medicine is devoted to the study and observation of the medical cases in the Hospital according to the most modern methods.

Scientific examinations are made of the urine, blood, sputum and various excretions and secretions of the body. Accurate records are kept of each case and careful observations made from time to time, thus aiding materially in clearing the diagnosis of obscure cases as well as in treating the patients in the Hospital. Under the direction of Dr. Steinmetz, the necessary laboratory work in connection with patients assigned to members of the senior class in their clinical conferences, is systematically carried forward during the sessions.

PATHOLOGY AND BACTERIOLOGY

Pathologist

JOSEPH H. MCFARLAND, M.D.

Bacteriologist

J. HAMILTON SMALL, M.D.

The Laboratory of Pathology and Bacteriology conducts the microscopical examinations of diseased tissue before operation to determine upon the radical or palliative course the surgeon shall pursue, and after the operation to aid in an accurate estimate of the benefits that can be expected. In this laboratory also the discharges from all kinds of diseased tissue and the secretions of diseased organs are miscroscopically, culturally and chemically investigated by the most recent methods.

As Bacteriologist to the Medico-Chirurgical Hospital, I have to report that during the year ending June 1, 1913, the Hospital Staff used the facilities of the Laboratory of Bacteriology, as an aid to diagnosis, and for preparation of vaccines, to a greater extent than in the past.

Various specimens and tests were daily reported upon. Many blood cultures were made and autogenous vaccines prepared. More than seventy-five Wasserman reaction tests were made for charity patients and five for patients occupying private rooms.

J. Hamilton Small, Phar.D., M.D.
Bacteriologist.

LABORATORY OF THE DEPARTMENT OF CLINICAL MEDICINE

Under the direction of Judson Daland, M.D.

This laboratory is devoted to a careful and scientific study of all patients entering the service of the Professor of Clinical Medicine, and also all laboratory work in connection with patients assigned to members of the Senior Class in their Clinical Conferences.

Permanent records are made of the examinations of the urine, blood, sputum, feces, gastric contents and secretions of the body. These examinations are invaluable as aids in the diagnosis of obscure diseases, and a necessary guide to the intelligent care and treatment of patients.

LABORATORY OF NEUROPATHOLOGY

Under the direction of T. H. Weisenburg, M.D.

Assistants

S. D. Ingham, M.D. E. H. Erney, M.D.
Chas. G. Steinmetz, M.D. Ernest E. Laubaugh, M.D.
Josephine C. Frankenberger

The Laboratory of Neuropathology is for the purpose of examining all nervous tissue to determine the cause of nervous and mental diseases. In it is also carried out experimental work to determine if possible their preventative causes. Sections are prepared for the better teaching of this subject to the medical students. The specimens are used for similar purposes.

REPORT OF THE PRESIDENT

OF THE

BOARD OF TRUSTEES

OF THE

MEDICO-CHIRURGICAL HOSPITAL

OF THE CITY OF PHILADELPHIA

FOR THE YEAR ENDING MAY 31, 1913.

May 31, 1913.

The Thirtieth Annual Report of the Medico-Chirurgical Hospital, for the year ending May 31, 1913, is herewith submitted.

From the statistics and detailed information given in the reports of the Treasurer, Superintendent, Registrar, and the Directors of the various departments, it will be seen that the year just closed was an exceedingly busy one for the Hospital and that a great amount of efficient service was rendered in the care of the sick and suffering.

The most notable event of the year was the establishment of a Social Service Bureau in connection with our Hospital. This was done in response to the need, now universally recognized, of an agency to supplement the work of the Hospital in the treatment of the unfortunate sick, a large proportion of whom need care and assistance beyond that which it is the function of the Hospital proper to give. The scope and aim of the Social Bureau are well set forth in its published announcement calling attention to some of the cases which may properly be referred to it, as follows:

1. Patients needing convalescent care.
2. Where a knowledge of home conditions will be of service to the physician.
3. Needing permanent care, institutional or otherwise.
4. Needing escort to train or home.
5. Needing the advantages of such existing agencies as an Employment Bureau, Ward Charity Organization, and Housing Commission.

6. When patient insists on leaving hospital against advice.

7. Where there is need of following up patients after leaving hospital; for example, convalescent children.

8. Patients needing surgical appliances.

9. Persons needing special hospital care: Tuberculous patients, nervous diseases, maternity cases, etc.

10. Needing instruction in hygiene.

11. Sex problems: unmarried mothers, morally exposed.

12. Where, through ignorance or poverty, patients cannot carry out doctor's orders.

13. Contagious or infectious diseases, when advice is needed about nature of contagion, such as trachoma, syphilis, etc.

14. Where anxiety about home conditions retards recovery.

15. Specific diseases in women and children.

It is evident from the foregoing statement of its functions what a valuable adjunct to the Hospital the Social Service movement is, not only in supplementing the medical and surgical treatment given in the Hospital, especially in the out-patient department, thus making that service more efficient and results more permanent, but also in extending the good done by the Hospital along educational and charitable lines far beyond the limits of its own walls.

The Board of Trustees welcomed this opportunity of increasing the institution's field of usefulness, and promptly voted its hearty support and approval of the establishment of the Medico-Chirurgical Hospital Social Service in December last. The Hospital supplies bed and board for the Social Worker, as requested by the Board of Directors of the Bureau, but beyond this is unable to give any financial assistance. The Social Service is, therefore, wholly dependent upon donations and subscriptions from private sources. We heartily commend the movement as one worthy of the interest and generosity of all who wish to help the unfortunate sick along the lines of the latest development in scientific charitable service.

We desire especially to make this public acknowledgment of our indebtedness to and appreciation of the valuable services of Prof.

James M. Anders, to whom, more than to any other person, Social Service at the Medico-Chirurgical Hospital owes its inception and successful launching. Also to Mrs. F. Hazard Lippincott and to Mrs. James M. Anders for their generous services in making the entertainment which was given at the Bellevue-Stratford Hotel for the benefit of the Social Service Bureau the great success that it was from every standpoint.

To meet the urgent need of more room and better facilities for the increasing work of the X-Ray and Electro-Therapeutic Department, under the Directorship of Professor George E. Pfahler, the Board of Trustees approved the recommendation of the Hospital Staff that the portion of the first ward floor formerly used for semi-private wards be set aside for the use of the X-Ray and Electro-Therapeutic Department. Plans for the alterations and improvements made necessary thereby are well under way, and in the near future the Hospital will be equipped for the most modern and efficient service in this line of work, which each year grows to be a more important function in the diagnosis and treatment of disease by scientific methods.

Some very valuable new equipment for this deserving department will be made possible by the liberality of Miss Mary F. Bishop, of this city, who, through Professor Pfahler, has agreed to contribute $2,000 in the near future for apparatus and equipment to be purchased for the institution by Professor Pfahler. The Board of Trustees has passed appropriate resolutions accepting Miss Bishop's gift and expressing its high appreciation of her generosity and interest in the Hospital and in the good work being accomplished there by the Director of the department.

Grateful acknowledgment is hereby made of the gift of $500 by Mr. William B. Sheppard for furnishing a private room in the main hospital and private rooms in the children's department. Mr. Sheppard was elected a Life member of the Hospital in recognition of his gift.

Also of the final payment of $1,000 by the Alumnæ Association of the William Penn High School for Girls, completing its fund for the endowment of a Perpetual Free Bed for use of its members.

The vacancy on the Board of Trustees caused by the resignation of Mr. W. Howard Pancoast, was filled by the unanimous election, on January 20, 1913, of Mr. William B. Sheppard, a well-known business man of Philadelphia. Mr. Sheppard has shown a deep interest in the work of the Hospital.

Upon the recommendation of the Hospital Committee, Dr. Ross Hall Skillern was elected Laryngologist to the Hospital, *vice* Dr. Arthur H. Cleveland, Emeritus.

Minor changes in the personnel of the staff of assistants are recorded in the respective departmental statements printed elsewhere in this report.

G. von Phul Jones, Esq., very generously accepted the position of Solicitor, to which he was elected by the Board of Trustees, *vice* John K. Andre, Esq., deceased. We are greatly indebted to Mr. Jones for the legal services that he has so cheerfully given to the institution.

The thanks of the Board of Trustees are due and are hereby extended to Hon. Dimner Beeber, LL.D., for his very able and pleasing address to the graduating class at the Nurses' Commencement exercises on May 28th.

We also extend our especial thanks to the members of the Hospital Staff and to the officers of the Hospital for their co-operation and assistance in the management of the institution, and also to the nurses and employees for faithful service in the performance of their respective duties.

HENRY F. WALTON,
President.

REPORT OF THE SUPERINTENDENT

FOR TWELVE MONTHS ENDING MAY 31, 1913.

To the President and Board of Trustees of the Medico-Chirurgical Hospital of the City of Philadelphia:

Gentlemen:—I beg leave to present my report for the twelve months ending May 31, 1913:

Patients remaining in the Hospital May 31, 1912		160
Patients admitted to wards	2,573	
Patients admitted to private rooms	654	
Total admissions in Hospital		3,227
Treated in Hospital		3,387
Discharged from Hospital		3,220
Remaining in the Hospital May 31, 1913		167
Free patients admitted to the Hospital		1,449

ANNA C. GRIFFITH 1908

The past twelve months have been marked by continuous advancement. The Wards, both Public and Private, have been filled to their utmost capacity at all times.

I am glad to again thank the Nurses and Internes for their efficient and faithful services rendered to the Hospital during the past twelve months.

The patients have enjoyed the visits of the clergy of the various denominations. We desire to express our thanks to the latter for their cheerful and ready response to the urgent calls that have been made. We appreciate the kindness of the First Testament Circle of Philadelphia in rendering their song service, and also the visits of the ladies from Holy Trinity Church, which have been very beneficial in cheering the patients.

We wish to thank our many friends for their generous gifts, and trust their interest in the Hospital will continue.

I fully appreciate the interest and suggestions offered by the Finance Committee, and other members of the Board of Trustees, who have so freely visited the Hospital, and especially the counsel and encouragement received from our President.

The hearty co-operation of the members of the Hospital staff and loyalty of the heads of the various departments of the Hospital has been most gratifying.

Respectfully submitted,

GEO. C. SIGNOR,

Superintendent.

REPORT OF
THE TRAINING SCHOOL FOR NURSES

To the President and Members of the Board of Trustees of the Medico-Chirurgical Hospital of the City of Philadelphia:

I, herewith, submit the Twenty-first Annual Report of the Training School for Nurses for the period (twelve months) ending May 31st, 1913.

The Training School Committee, the Faculty, the Superintendent, the Ladies' Aid Society and our many other friends have been as generous as ever in their support, and are deserving of our most cordial thanks for all their kindness. The entertainments given during this year, especially the Christmas dance, were a great success, and confirm us in our idea that they are a valuable means of furnishing our pupils with pleasure and an opportunity for relaxation.

The general course of instruction for the year has progressed very satisfactorily. The instruction consists of a graded course for three years, consisting of lectures, demonstrations and class recitations, supplemented by practical bedside instruction in caring for the sick and injured. There is also a course in dietetics and massage, together with the practical instruction demanded by the modern development of medicine and surgery.

The graduating class of 1913 numbered seventeen; and quite a number of these nurses have accepted hospital appointments in various parts of the country. The Gold Medal for the highest general average was given to Miss Katherine Obert. The Mrs. Thomas J. Jeffries Prize, consisting of a complete nurse's traveling outfit, was awarded to the nurse showing the highest efficiency in the Children's Department, Mrs. Florence Peters.

The Social Service Bureau, founded by the happy inspiration of Professor James M. Anders, is under the efficient direction of Miss M. Reba Cole, one of our own Training School graduates, and who comes to us from Cleveland, Ohio, where she had been in this work for several years. Miss Cole has already been able to accomplish much good work by reason of the hearty co-operation of the members of the Bureau, more especially Mrs. F. Hazard

Lippincott, Mrs. James M. Anders, Mrs. Albert Rosengarten and others. The Bureau has proved to be a valuable adjunct to the work of the Hospital and Training School and the future, we feel sure, will witness the training of our nurses in this all important department of work.

I desire to express my appreciation of the services rendered by the attending physicians and surgeons in caring for the sick nurses and for lectures during the year.

The present organization of the school is as follows:

Directress of Nurses	1	
Assistant Directress of Nurses	1	
Graduate Head Nurses	5	
Dietitian	1	
Instructress in Massage	1	
Pupils in Senior Class		17
Pupils in Intermediate Class		13
Pupils in Junior class		23
Probationers		9
Total number of pupils		62
Number of application blanks distributed		410
Number of application blanks received		218
Number of probationers admitted		33
Number of probationers dismissed		10
Number of probationers resigned		4
Number of pupils resigned		2
Number of pupils dismissed		1

Respectfully submitted,

ELIZABETH V. LOBB, R. N.,
Directress of Nurses.

Gifts to the School

Eighty pounds of Candy.....Mr. Wm. J. McClary
Twelve pounds of Bon-bons.....Mrs. Ernest Laplace
Ten Dollars.....Mr. C. S. Hawkins
"American Beauty" Roses for each graduate nurse.....Mr. C. S. Hawkins
Nurse's Case of Instruments, for second prize to graduating class.....Ladies' Aid Society
Nurse's Traveling Outfit.....Mrs. Thomas J. Jeffries
Hand-book on "Practical Nursing" to each graduate.....Nurses' Alumnæ Association
Basket of Fruit.....Mrs. Wm. H. Greene
Easter Greetings.....Mr. Frank P. Croft
Christmas Tree and Floral Decorations.....Mrs. Thomas J. Jeffries
Twenty Theatre Tickets.....Dr. Goddard
Ladies' Home Journal for one year.....Dr. J. P. Mann

Catherine Murphy—Private nursing.

REPORT OF
THE MATERNITY DEPARTMENT

Since the opening of the new Maternity Department four years ago, the number of patients has increased and there has been a marked improvement in the work, owing to the facilities offered in the modern and well-equipped building. The Hospital now offers every facility to carry on this important work. The marvelous changes brought about during the last two decades in reducing the death rate in child-bed is essentially due to the direct application of modern antiseptic methods. The surroundings of the poorer class in their homes are as a rule unhealthy, and it is impossible, with the most careful attention to asepsis, to obtain the same results as are obtained in the Maternity Hospital.

The Board of Managers hope that the general public will assist them in advancing this department.

June 1, 1912, to June 1, 1913

REPORT OF
THE X-RAY DEPARTMENT
OF THE
MEDICO-CHIRURGICAL HOSPITAL

The X-Ray Department has been open daily (except Sunday) from 12 to 3 o'clock (very often until 4 or 5 o'clock) for the examination and treatment of patients.

During the past year 2318 examinations, or negatives, were made. These examinations were demanded on account of fractures and diseases of bones, dislocations and diseases of joints, diseases of the lungs and heart, diseases of the accessory sinuses and of the mastoid cells, diseases of the brain and skull, and diseases of the spinal column. There have been numerous examinations of the teeth and jaws which have served to demonstrate the cause of neuralgia and painful conditions about the face, and in many instances have served to point the way for the relief of patients who have suffered for months and years.

The study of the stomach and bowel has given so much favorable evidence, and the diagnosis of obscure conditions such as carcinoma, ulcer, adhesions, loops, kinks, etc., that at present few operations are undertaken without such preliminary study.

Such examinations are both expensive and time-consuming, and on this account make more and more demands upon the resources of the laboratory. Much has been accomplished in our older and cramped quarters, and we hope to be able to do more work in less time in the new and more commodious quarters which have been granted.

During the year there have been 2880 treatments given to patients by means of the X-Rays. These were given for carcinoma, sarcoma, leukemia, Hodgkin's disease, tuberculous glands, lupus, epithelioma, acne, keloid, eczema and fibroids of the uterus.

In addition to the X-Ray examinations, there have been 338 photographic negatives made for the permanent records of the diseased conditions of patients before and after treatment.

We are making an effort to reduce the number of treatments per patient, and thus be able to treat more patients in the same period of time.

The results obtained from treatment are more encouraging than ever, and in some instances remarkable.

Mr. Richard L. Austin has conferred a favor upon the department by presenting a 12 plate, high speed Baker Static Machine, with a tube stand, which will enable us to do more and better therapeutic work. I desire to add my personal thanks to those already expressed by the Board of Trustees.

(Signed) GEORGE E. PFAHLER, M.D.,
Director of the X-Ray Department.

REPORT OF THE ELECTRO-THERAPEUTIC DEPARTMENT

This department has been open daily, except Sunday, from 9.30 to 12 A. M.

The work has steadily increased in volume. There were given 3228 treatments during the past twelve months, an increase of 450 over the preceding year.

The increase of space so urgently needed has fortunately been granted. With the establishment of waiting and dressing rooms, and the concentration of equipment in the more commodious new quarters, the capacity for effective work will be greatly augmented.

The treatments have been productive of marked benefits, many gratifying results having been secured in cases referred by the Eye Department.

The following is a list of the diseases treated during the last year:

Alopecia areata,
Amblyopia,
Arteriosclerosis,
Arthritis deformans,
Arthritis—traumatic,
Anterior poliomyelitis,
Adhesions—post operative,
Cataract,
Chorea,
Choroiditis,
Corneal opacity,
Chorio-retinitis,
Constipation,
Cyclitis,
Descemetitis,

We extend thanks to the Hospital Staff, Resident Physicians, Superintendent, Nurses, Office Staff, and Physicians of Philadelphia for the courtesy they have shown the department, and especially to Miss Else Mahr (the special nurse) for her valuable assistance.

WILLIAM T. JOHNSON, M.D.,
Electro-Therapeutist.

GEORGE E. PFAHLER, M.D.,
Director of Electro-Therapeutic Department.

REPORT OF THE CLINICAL LABORATORY

Specimens to the number of nine thousand two hundred and seventy-eight (9278) necessary in the diagnosis and observance of the course of the various diseases under treatment were submitted from the various departments for examination, enumerated as follows:

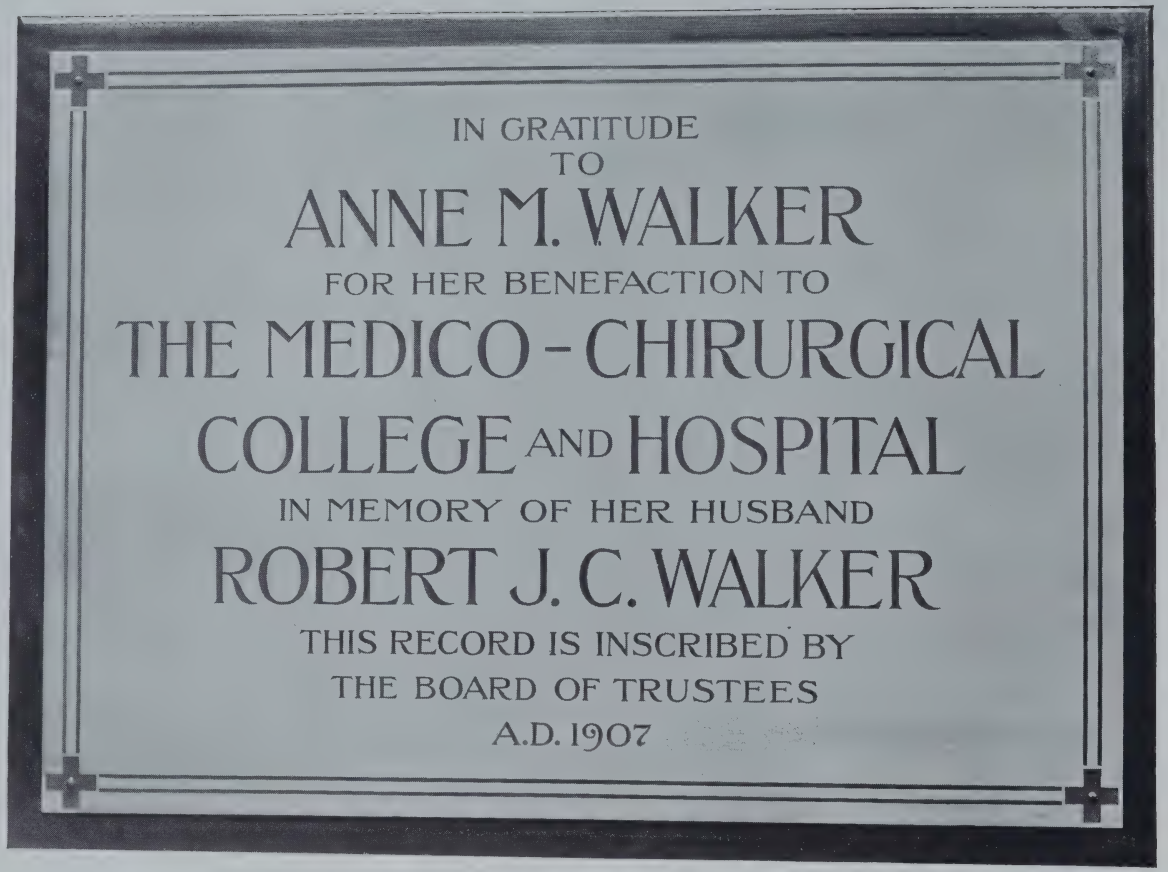

Complete analyses of urine	5,800
Blood counts (complete)	1,116
Analyses of Ewald-Boas Test Breakfasts	160
Examinations of sputum for Tubercle Bacilli	412
Estimations of the arterial blood-pressure	1,512
Complete analyses of the feces	100
Miscellaneous secretions:	
from eye	12
from vagina	36
from urethra	24
Serous fluids:	
Pleural	78
Abdominal	28

In addition to the above the members of the Senior class are required to perform under the guidance of the instructor Dr. Steinmetz, the necessary examinations of urine, blood, blood-pressure, etc., from the patients assigned for practical training in diagnosis by the Professor of Medicine. These investigations are made either daily or every second day as the exigencies of the particular case may require.

The laboratory is thus maintained not only for the conduct of routine analyses necessary for the successful examination of patients in the hospital, but also furnishes the opportunity for the practical study of laboratory technique by the students.

We have been benefited by new apparatus as the demands of work required it and by improvement in the system of collecting specimens have been able to furnish more prompt reports.

There has been a moderate increase in the number of specimens examined during the past year owing to the added number of beds on the private and semi-private floors.

IN GRATITUDE
TO
ANNE M. WALKER
FOR HER BENEFACTION TO
THE MEDICO-CHIRURGICAL
COLLEGE AND HOSPITAL
IN MEMORY OF HER HUSBAND
ROBERT J. C. WALKER
THIS RECORD IS INSCRIBED BY
THE BOARD OF TRUSTEES
A.D. 1907

In conjunction with the above, special research examinations have been made, in an effort toward furthering scientific knowledge in the study of diseased conditions.

I desire to express my appreciation of the courtesies extended during the year by the Hospital Staff, Resident Physicians, Superintendent, Office Staff and Nurses.

WARREN C. BATROFF, M.D.,
Director.

REGISTRAR'S REPORT

CASES TREATED IN THE HOSPITAL FROM JUNE 1, 1912, TO MAY 31, 1913.

Medical Diseases

Acromegaly	1
Addison's Disease	1
Alcoholism—	
Acute	29
Anemia—	
Chloro	1
Pernicious	3
Simple	2
Aneurysm	3
Angina pectoris	1
Angina pseudo	2
Apoplexy	15
Arterio sclerosis	9
Arthritis—	
Deformans	21
Gonorrhœal	3
Tubercular	4
Asthma—	
Bronchial	9
Cardiac	3
Ataxia—

Cases Treated in the Eye Dispensary

Affections of the Eyeball—
- Atrophy 4
- Buphthalmos 3
- Contusions 108
- Enucleations 6
- Foreign bodies 6
- Glioma 1
- Lacerations 12
- Phthisis bulbi 4
- Sarcoma 1

Affections of conjunctiva—
- Abrasions 8
- Burns 14
- Chemosis 12
- Conjunctivitis 386
- Gonorrhœal ophthalmia 6
- Hemorrhage subconjunctival 32
- Ophthalmia neonatorum 8
- Papilloma 1
- Pterygium 26
- Trachoma 14

Affections of cornea—
- Burns 14
- Foreign bodies 269
- Hypopyon 11
- Interstitial keratitis 18
- Keratitis punctata 4
- Keratitis, traumatic 3
- Leukoma 31
- Macula 10
- Nebula 32
- Pannus 14
- Sclerosis 2
- Staphyloma 6
- Ulcers of cornea 200

Affections of Lens—
- Aphakia 1
- Cataract 143
- Dislocations 5

Affections of Lids—
- Abscess 20
- Blepharitis marginalis 67
- Blepharospasm 5
- Burns 5
- Chalazion 27
- Ecchymosis 15
- Ectropion 2
- Edema of lids 10
- Entropion 10
- Epithelioma 2
- Hordiolum 67
- Lacerations 4
- Ptosis 4
- Sebaceous cyst 3
- Trichiasis 4
- Zanthelasma 3

Affections of choroid—
- Choroiditis 60

OUT-PATIENT DEPARTMENT AND LABORATORY OF THE
MEDICO-CHIRURGICAL HOSPITAL

The Medico-Chirurgical College

Inasmuch as the Hospital and College are intimately related in so many ways, the friends of the one will be interested to know that the other is maintaining its hitherto excellent record and is making progressive improvement in various directions. The several departments bring together a large enrollment from not only all parts of our own country, but also from many foreign lands, the list of the past session including representatives from Cuba and Porto Rico, Mexico, Central and South America, Germany, Russia, Italy and Persia, and indicating the wide-spread fame of our institution.

Extensive changes and improvements have been made in the college buildings, and we now have, with our hospital facilities, a plant and equipment most admirably fitted for the practical teaching of Medicine and its allied branches, and one surpassed by few in the country. The construction of the new Dispensary has enabled the College to utilize the space formerly occupied by the out-patient departments and by the construction of new offices and additional lecture rooms, quiz rooms, laboratories, etc., greatly to increase the usefulness, comfort and convenience of the college buildings. The College Club has also proved its value and provides a place where all connected with the College can find a good library, wholesome and palatable food, and opportunities for social intercourse and recreation in an agreeable and moral environment, all these being of great value to students away from home.

The record made by our graduates before the various state examining boards throughout the country for several years past has demonstrated that the school ranks among the best in the country and even above some much older and with a more extended reputation. For example, in 1911 the graduates in Medicine of that year passed all state board examinations with no failures, no other college with as many candidates making such a record. Moreover, a very large proportion of the graduates in medicine secure, mainly by competitive examination, positions as resident physicians in other hospitals and institutions, so that whatever of education is given to them through our facilities and equipment extends beyond our walls to benefit a multitude of others.

We trust, therefore, that our friends will appreciate that not the least important of the Hospital's functions is the assistance it gives to the College in the training and developing of skilled and intelligent physicians, dentists, pharmacists and chemists for the future service of the city, state and country, and that they will continue to believe that it is our fullest purpose to maintain an institution of which, in every respect, all may be justly proud.

Form of Bequest for Personal Estate

I, —— ——, give and bequeath to the Medico-Chirurgical Hospital of the City of Philadelphia, the sum of——, to be paid to the Treasurer for the use of said Hospital.

Devise of Real Estate

I, —— ——, give and devise unto the Medico-Chirurgical Hospital of the City of Philadelphia, all that (here describe the property with the appurtenances).

Form of Bequest for Endowment of a Free Bed

I, —— ——, give and devise and bequeath unto the Medico-Chirurgical Hospital of the City of Philadelphia, the sum of Five Thousand Dollars in full and free of taxes, for the Endowment of a Perpetual Free Bed.

Endowment of a Perpetual Free Bed	$5,000 00
Endowment of an Annual Free Bed	250 00
Child's Perpetual Free Bed	2,500 00
Life Membership	100 00
Annual Membership	10 00

Subscriptions or donations may be sent to the Treasurer, MR. DAVID MILNE, or contributions through any member of the Board of Trustees, or the Superintendent.

CONTRIBUTIONS AND LEGACIES ARE MOST EARNESTLY SOLICITED

The Hospital needs a larger Endowment. Gifts by legacy are solicited and the establishment of Perpetual Free Beds in memory of those who have passed away.

A Donation of Five Thousand Dollars endows a Free Bed in perpetuity and entitles the donor to nominate patients.

MEDICO-CHIRURGICAL HOSPITAL

OF THE CITY OF

PHILADELPHIA

1913-1914

MATERNITY AND CHILDREN'S DEPARTMENTS OF THE MEDICO-CHIRURGICAL HOSPITAL
EIGHTEENTH AND CHERRY STREETS, PHILADELPHIA

Thirty-First Annual Report

OF THE

Medico-Chirurgical Hospital

OF THE CITY OF PHILADELPHIA

PUBLISHED BY
AUTHORITY OF THE BOARD OF TRUSTEES

JUNE 1, 1913, TO MAY 31, 1914

The Medico-Chirurgical Hospital is non-sectarian. It is open day and night for the reception of the sick and injured.

The Free Dispensary service is open daily, except Sunday, New Building, 1724 Cherry Street.

The Maternity Department, situated at the northeast corner of Eighteenth and Cherry Streets, receives free of charge poor women who are in need of care at the time of their confinement.

The Children's Department, situated at the northeast corner of Eighteenth and Cherry Streets, is devoted exclusively to the treatment of poor children suffering from disease or deformity.

The Hospital needs a larger Endowment. Gifts by legacy are solicited and the establishment of Perpetual Free Beds in memory of those who have passed away.

A Donation of Five Thousand Dollars endows a Free Bed in perpetuity and entitles the donor to nominate patients.

GIFTS BY WILL

In the State of Pennsylvania, testamentary provision for a charitable institution must be by a will made at least thirty days prior to the decease of the testator. The signature of the testator must be attested by at least two subscribing witnesses, who should sign their names as witnesses thereto in the presence of the testator and of each other.

None of these witnesses should be interested in any manner in the institution intended to be benefited, as manager, trustee, officer, employee, beneficiary or otherwise.

The testator may either bequeath personal property or devise real estate to the institution generally, or may create an endowment whereby only the income therefrom shall be used for its benefit.

The following forms are suggested for a legacy of personal property and a devise of real estate, where it is intended that the same shall be devoted to the use of the Hospital generally without restriction:

Form of Bequest for Personal Estate

I, ——— ———, give and bequeath to the Medico-Chirurgical Hospital of the City of Philadelphia, the sum of———, to be paid to the Treasurer for the use of said Hospital.

Devise of Real Estate

I, ——— ———, give and devise unto the Medico-Chirurgical Hospital of the City of Philadelphia, all that (here describe the property with the appurtenances).

Form of Bequest for Endowment of a Free Bed

I, ——— ———, give and devise and bequeath unto the Medico-Chirurgical Hospital of the City of Philadelphia, the sum of Five Thousand Dollars in full and free of taxes, for the Endowment of a Perpetual Free Bed.

Endowment of a Perpetual Free Bed	$5,000 00
Endowment of an Annual Free Bed	250 00
Child's Perpetual Free Bed	2,500 00
Life Membership	100 00
Annual Membership	10 00

Subscriptions or donations may be sent to the Treasurer, Mr. David Milne, or contributions through any member of the Board of Trustees, or the Superintendent.

CONTRIBUTIONS AND LEGACIES ARE MOST EARNESTLY SOLICITED

Acknowledgments of Donations and Contributions

LIST OF CASH DONATIONS, MAY 31, 1913, to JUNE 1, 1914

Adams Express Co.	$150.00
Baldwin Locomotive Works	500.00
Bishop, Mrs. Mary F. (Special Donation for the X-Ray Department, Dr. Pfahler)	2,000.00
Chesterman, D. L.	10.00
Estate of Mary Dowling	25.00
Grateful Patient	10.00
Greene, William H.	500.00
Heppe, Florence J.	5.00
Jenson Press	10.00
Midvale Steel Co.	100.00
Sharpless, W. M. & F. W.	25.00
Wolf, Isaac & Co.	250.00
Total	$3,585.00

DONATIONS OF SUPPLIES

RECEIVED DURING THE YEAR, MAY 31, 1913, TO JUNE 1, 1914.

Adams Express Co.	One pair of rubber tip crutches.
Ashton, Dr. W. Easterly	Nineteen Dollars and Fifty Cents for nurses.
Athletic Club of Philadelphia	Donation of Magazines.
Biggart, Mrs. E.	Flowers for ward patients.
Birdsall, Mrs. Anita	Donation of Magazines.
Carruth, Mr. John G.	Fluoroscopic Table, complete, for X-Ray Department.
Case, Dr. Eugene	Books for patients.
Dobson, Miss Ann	Christmas toys for children.
Evans, Geo. B. & Co.	Christmas cards and dolls for children.
Flower & Fruit Guild—Torresdale Branch	Two boxes of flowers per week.
Flower & Fruit Guild—Woodbury Branch	Twelve boxes of cut flowers.
Folger, Mr. Walter	One Dollar for nurses.
Fox, Mrs. Alexander	Flowers.
Fox, Dr. L. Webster	Five Dollars, Christmas tree.
Friend	Easter Candies for the children.
Gentner, Mr. Charles P.	Books and magazines for nurses.
Goddard, Dr.	Theatre tickets for nurses.
Haas, Mrs. Charles H.	One dozen silver knives and forks and two dozen silver spoons.
Haehnlen, Mrs. Frank	Five pounds of choice Bonbons for nurses.
Hawkins, Mr. C. H.	Ten Dollars, American Beauty Roses for each graduate.
Horton, Mrs. Roger (through Dr. H. Brooker Mills)	Eighteen night wrappers, seven dozen napkins for children's ward.
Hutchinson, Mrs. Wm. (through Dr. Chas. B. Reynolds)	Six oak rocking chairs, five dozen children's bibs, Christmas toys for children.
Jeffries, Mrs. Thos. J.	Six white enameled iron chairs and large quantity of toys for children's ward, Christmas trees and floral decorations for nurses, six Christmas trees and new trimmings, sweaters for all children and male ward patients, dressing jackets and twelve dozen bed socks for women ward patients.
Ladies' Aid Society	Traveling clock for third prize to graduating class.

Donations of Supplies—Continued.

Ladies' Committee	Rugs for twenty private rooms, twelve wicker rocking chairs and four wicker tables for Sun Parlor.
Laplace, Mrs. Ernest	Six pounds choice Bonbons for nurses, two screens for private rooms.
Lentz, Chas. & Sons	Nurse's case of instruments for second prize to graduating class.
McClary, Mr. Wm. J.	Eighty pounds of candy for nurses, one large four oven coal range, one large six burner gas range, one dish washing machine, one sectional steamer, one large steam cooking table with German silver platters, one large serving table, painting of the Culinary Department in general, fifty gold fish for fountain in Dispensary, twelve potted ferns for fountain in Dispensary, twenty-five pounds Christmas toy candies for children.
McKenna, Dr. John	Demonstrating Doll for nurses.
Mann, Dr. J. P.	Ladies' Home Journal for one year for nurses.
Markland, Mr. Geo. L., President Philadelphia Gear Works (through Dr. R. S. Davis)	Fifty Dollars.
Noe, Elizabeth	Easter baskets for children.
Nurses' Alumnae Association	Hand-book on Practical Nursing to each graduate.
Pennock-Meehan Co.	Three boxes of flowers.
Pomerantz & Co.	Prize for Nurses' Commencement, Gold Fountain Pen.
Price, Est. of Susan B., Dec'd	Three large floral pieces.
Sheppard, Mr. Wm. B.	One large rocking horse for children's play room, two large Christmas trees and trimmings.
Stamm, Dr. C. J.	Desk and twenty-four oak chairs for class room.
Stanley, Dr.	Five Dollars for nurses.
Skillern, Dr. Ross Hall	Table and seven chairs for nurses.
Thornton, Mr. John	Large floral, wreath.
Watchful Circle of Kings' Daughters	Twenty-three bunches of roses.
Webb, Mrs. Cora	Books and magazines.

REPORT OF THE ACTING PRESIDENT

OF THE

BOARD OF TRUSTEES

OF THE

MEDICO-CHIRURGICAL HOSPITAL

OF THE CITY OF PHILADELPHIA

FOR THE YEAR ENDING MAY 31, 1914.

May 31, 1914.

The Thirty-first Annual Report of the Medico-Chirurgical Hospital for the year ending May 31, 1914, is herewith submitted.

The reports of the Treasurer, Superintendent, Registrar, and the Directors of the various departments, printed elsewhere, show in detail the activities and accomplishments of the year, as well as the financial and general condition of the Hospital. From these reports it will be seen that the year just closed was one of progress and advancement for the institution, and that an enormous amount of efficient service was rendered for the benefit of the sick and suffering.

It is with great sorrow that we record the death of one of our colleagues, Professor Edwin J. Houston, upon whose demise the Board of Trustees, at a special meeting held on March 3d, unanimously adopted the following minute:

Be It Resolved, That in the death of Professor Edwin J. Houston, the Medico-Chirurgical College and Hospital have sustained a great loss. For a period of twelve years, Professor Houston was an active and devoted member of the Board of Trustees, and gave abundantly of his time and ability for the upbuilding of the institution. His unselfish love of service for his fellowman made him a most loyal and sympathetic worker for the Hospital, and his rich store of wisdom gained from his long experience as a leader in scientific education in this community made his counsel and services invaluable to the College, which he served

with distinction as Chairman of the College Committee of the Board of Trustees for more than a decade. As a colleague, Professor Houston was beloved and respected, and his memory will long be cherished by those associated with him in the management of the Medico-Chirurgical College and Hospital.

BE IT FURTHER RESOLVED, That we extend our deepest sympathy and condolence to the family, and that an engrossed copy of this minute be forwarded to them.

We regret exceedingly to have to note the retirement from the Board of Hon. Henry F. Walton and of Hon. Walter T. Merrick, both of whom resigned because of press of other duties. Mr. Walton was a member of the Board since 1904 and was its President since 1905; Mr. Merrick was elected to membership on the Board in December, 1901, and served as its Vice-President for a brief period. The Board of Trustees accepted the resignations of these two gentlemen with great regret, and gave fitting recognition and praise of their long and active service on behalf of the Hospital by passing appropriate resolutions.

The three vacancies on the Board of Trustees were filled by the election, on April 20th, of Mr. George H. McNeely, a well-known business man of Philadelphia, and by the election, on June 18th, of Professors James M. Anders and Ernest Laplace, members of the Hospital Staff, both of whom have just completed twenty-five years of active service in the institution.

Mr. George C. Signor, for eight years Superintendent of the Hospital, resigned August 25th, to accept the superintendency of the Eastern Pennsylvania State Institution for Feeble-Minded and Epileptic at Spring City, Pa. Miss Elizabeth V. Lobb, Directress of Nurses, was elected Superintendent on November 17th, retaining at the same time her position as Directress of Nurses. Miss Venetta V. Kahler was promoted to the position of Assistant Directress of Nurses, and Miss Emma C. Smith was made Instructor to the Training School for Nurses.

There were no changes in the Staff of the Hospital during the year. A number of additions were made to the Assistant Staff to meet the increasing demands of the service of the Hospital, due record of which is made elsewhere in this report.

Grateful acknowledgment is hereby made to Mrs. Louisa M. Anshutz for her generous contribution of Five Thousand Dollars for the endowment of a "Perpetual Free Bed for Diseased Eyes" in memory of her mother, Ann M. Miller.

The thanks of the Board of Trustees are due and are hereby extended to Surgeon-General Charles F. Stokes, U. S. N., who delivered a very able and pleasing address to the graduating class of the Nurses' Training School at their commencement exercises on May 27th.

It is again our pleasant privilege to thank our Solicitor, G. von Phul Jones, Esq., and our Consulting Engineer, Mr. Jay M. Whitham, for counsel and advice. And also to make this public acknowledgment of our indebtedness to the members of the Hospital Staff and to the officers of the Hospital for their hearty co-operation and assistance in the management of the institution, as well as to the nurses and employes for faithful performance of their respective duties.

JOHN G. CARRUTH,
Acting President.

REPORT OF THE TREASURER

OF THE

MEDICO-CHIRURGICAL HOSPITAL

OF THE CITY OF PHILADELPHIA

FOR TWELVE MONTHS ENDING MAY 31, 1914.

REPORT OF THE SUPERINTENDENT

FOR TWELVE MONTHS ENDING MAY 31, 1914.

To the President and Board of Trustees of the Medico-Chirurgical Hospital of the City of Philadelphia:

Gentlemen:—I beg leave to present my report for the twelve months ending May 31, 1914:

Patients remaining in the Hospital May 31, 1913		167
Patients admitted to wards	3,170	
Patients admitted to private rooms	791	
Total admissions in Hospital		3,961
Treated in Hospital		4,007
Discharged from Hospital		3,865
Remaining in the Hospital May 31, 1914		142
Free patients admitted to the Hospital		1,822
Total number of days patients were maintained		58,012
Number of days patients were maintained free		28,204
Surgical operations, major	3,426	
Surgical operations, minor	2,473	
		5,899
Cases treated in the Out-Patient Department		58,982
Cases treated in the Accident Room		9,196
Accident cases admitted to the Hospital		333
X-Ray treatments and examinations		4,478
Electrical patients treated		2,971
Result of cases treated in the Hospital:—		
Cured	2,087	
Improved	1,485	
Unimproved	103	
Died	190	
		3,865
Remaining in Hospital May 31, 1914		142
Total treated in Hospital		4,007

During the past twelve months the work of the Hospital has increased to such an extent that I believe we should make note of the same The total number of admissions exceeded those of last year by 634; the total number of cases treated in the Hospital, 620; the number of free patients admitted, 373; major surgical operations, 1059; minor surgical operations, 603. Thus, it will be seen, we have materially increased our efficiency. The total number of cases treated in the accident room were 484 less than last year, but the cases treated in the out-patient department exceeded those of last year by 46,491.

I wish to thank the many friends of the Hospital for their generous gifts, and trust the interest they have taken in the past will continue. The valuable suggestions of the Finance Committee have been very helpful and greatly appreciated. To the other members of the Board of Trustees I am very thankful for their kindness and the frequency of their visits to the Hospital. The co-operation of the Hospital Staff, and the loyalty of the heads of the various departments has been most gratifying.

Respectfully submitted,

ELIZABETH V. LOBB, R. N.,

Superintendent.

REPORT OF THE CHIEF RESIDENT PHYSICIAN

FOR YEAR ENDING MAY 31, 1914.

I submit the following report for the year 1913–1914:—

The schedule of duties of the Resident Physicians as adopted by the Hospital Committee, June 1, 1913, has proven very satisfactory.

A	STATION	B
CLINICAL SURGERY: Private surgical cases, Roentgenology, Electro-Therapeutics, Alternate with Resident Physician B.	I	PRINCIPLES OF SURGERY: Private surgical cases, Clinical Neurology, Private neurological cases, Alternate with Resident Physician A.
CLINICAL MEDICINE: Private medical cases, Clinical Laboratory B, Children's diseases, Orthopedic surgery, Special calls for ether.	II	CLINICAL MEDICINE: Private medical cases, Clinical Laboratory B, Nose and Throat, Special calls for ether.
OPHTHALMOLOGY: Private ophthalmological cases, Dermatology, Toxicology, Second call for ether cases.	III	GYNECOLOGY: Private gynecological cases, Genito-Urinary cases, Second call for ether cases.
OBSTETRICS: Private obstetrical cases, Clinical neurology, Private neurological cases, Otology.	IV	RECEIVING WARD: Accident cases, Ambulance calls, Second call for Clinical Laboratory B, Oral Surgery.

The Chief Resident Physician to be called for any emergency.

There are eight Resident Physicians, four being on "A" division and four on the "B" division. The service on each station is three months, thus the entire service is one year.

The Out-Patient Department has been so thoroughly systematized that the Resident Physician, who is serving on the special branches, such as Orthopedics, Genito-Urinary diseases, Nose and Throat, Ophthalmology and Dermatology, is expected to spend one hour a day in these Dispensaries. The Resident Physician serving on oral surgery is required to spend one hour a day in the dental infirmary of the College Department.

During the year a number of contagious cases, such as scarlet fever, whooping cough, diphtheria, measles and chicken pox have been examined in our Receiving Ward and Dispensary, but prompt isolation and disinfection until the case could be sent to the Municipal Hospital prevented any transmission. We have also immediately isolated any suspicious cases which developed in our Children's Department.

The Operating Room and the extensive surgical service of our Hospital afford the Resident Physician excellent opportunities. The medical services are especially beneficial to the Resident Physicians, as they are conducted in the most up-to-date manner. In addition to the vast amount of clinical cases, we have two excellently equipped laboratories, which are always open to the Resident Physicians, where they may at any time do original research work.

The new automobile ambulance has greatly strengthened our accident service. During the year there were 627 calls, of which 229 were accident cases.

Through the generosity of the Board of Trustees, our Receiving Ward was remodeled, and I report that the improvement of our Receiving Ward service has amply repaid the Board for the expenses they incurred.

The Resident Physicians have been very faithful in the performance of their respective duties, and have gained the admiration of the Hospital Staff and the respect of patients treated at our Hospital during the year ending May 31, 1914.

Respectfully submitted,

T. M. O'ROURKE, M.D.,
Chief Resident Physician.

ONE OF THE ROOMS FOR PRIVATE PATIENTS IN THE MEDICO-CHIRURGICAL HOSPITAL

REPORT OF THE MATERNITY DEPARTMENT

Since the opening of the new Maternity Department four years ago, the number of patients has increased and there has been a marked improvement in the work, owing to the facilities offered in the modern and well-equipped building. The Hospital now offers every facility to carry on this important work. The marvelous changes brought about during the last two decades in reducing the death rate in child-bed is essentially due to the direct application of modern antiseptic methods. The surroundings of the poorer class in their homes are as a rule unhealthy, and it is impossible, with the most careful attention to asepsis, to obtain the same results as are obtained in the Maternity Hospital.

The Board of Managers hope that the general public will assist them in advancing this department.

JUNE 1, 1913, TO JUNE 1, 1914

IN MATERNITY HOSPITAL

Number of cases treated	228
Number of cases delivered	340

REPORT OF
THE X-RAY DEPARTMENT
OF THE
MEDICO-CHIRURGICAL HOSPITAL

The Roentgen Laboratory has been open daily (except Sunday), from 12 to 3 o'clock (very often until 4 or 5 o'clock) for the examination and treatment of patients.

During the past year 5579 examinations, or negatives, were made of 1602 patients. These examinations were necessary on account of fractures, diseases of bones, dislocations and diseases of joints, diseases of the lungs and heart, diseases of the accessory sinuses and of the mastoid cells, diseases of the brain and skull, and diseases of the spinal column. There have been numerous examinations of the teeth and jaws which have served to demonstrate the cause of neuralgia and painful conditions about the face.

With the increased equipment, and increased skill in making the examinations and demonstrating the results, the demand has, of course, increased, and as the records show, there has been one hundred per cent. more work done during this past year than has been done during the previous years.

The study of the stomach and bowels has given so much assistance in the diagnosis of obscure conditions such as carcinoma, ulcer of the stomach and bowels, adhesions, loops, kinks, etc., that at present most operations are preceded by this Roentgen study.

Such examinations are both expensive and time-consuming, and on this account make more and more demands upon the resources of the laboratory.

During the year there have been 5529 treatments, or doses of Roentgen Rays, given to 210 patients, who received this special treatment for such diseases as carcinoma, sarcoma, leukemia,

Hodgkin's disease, tuberculous glands, lupus, epithelioma, acne, keloid, eczema, fibroids of the uterus, etc. There has been an increase of one hundred per cent. in the amount of treatment given during the past year, and the results show a corresponding increase.

In addition to the Roentgen examinations, there have been 467 photographic negatives made for the permanent records of the patient before and after treatment. This doubling of the amount of work during the past year has been chiefly due to the increased space, and to the improvements made in the new department.

After the recommendation of the Hospital Staff, and with the approval of the Board of Trustees, the department was removed to the front of the hospital on the first floor, using the space previously occupied by the four semi-private wards. This has doubled our space, and has brought all parts of the laboratory together, thereby increasing our efficiency.

We have been somewhat hampered by the incomplete equipment of the new department, because the legislature would grant no appropriation for this purpose. Through the great kindness of Miss Mary A. Bishop, who donated $2000.00 toward the equipment of this department, we have been able to purchase an additional induction coil, and an over-head carrier and tube holder, which was imported from London; ten special air cooled tubes, with an air pump attachment which was also imported from London. All of this has served to increase our efficiency in the treatment of patients, and has permitted us to give more treatments than we could otherwise have done. This fund of Miss Bishop's has also permitted us to purchase a vertical fluoroscope, which is absolutely necessary today in the study of diseases of the chest, and the stomach and bowel. Lastly, this fund has enabled us to secure one of the new Coolidge tubes, with the necessary paraphernalia for its use in giving treatment for deep seated disease.

The establishment of this new department has also permitted us to make use of the twelve plate, high speed Baker Static ma-

chine, which was so kindly donated to the department a year ago by Mr. Richard L. Austin, and which has served to not only increase the number of treatments that we were able to give to patients, but has increased the efficiency of this treatment.

Recently, Mr. John G. Carruth, Acting President of the Board of Trustees, has donated to the department, a fluoroscopic table, which is just being installed. This will serve a great need, especially in the study of the stomach and bowels of patients, which study cannot be properly done otherwise.

Therefore, it is clearly seen that the year shows great progress in this department, and I desire to add my personal thanks to those already expressed by the officers of the institution, for these improvements that were permitted through the kindness of our friends mentioned above.

This field of medicine is developing so rapidly that, as new fields of usefulness open up, new equipment is demanded, and, therefore, while we have done well, our equipment is still incomplete. We are hoping to demonstrate to others, as well as to the doners, that such gifts accomplish great good.

I desire to extend my thanks to the Board of Trustees, Hospital Staff, Resident Physicians, Superintendent of Nurses, Office Staff, and physicians of Philadelphia, for the courtesies they have shown to the department, and especially to Dr. J. Donald Zulick and Dr. H. A. Cleaver, and to Miss Elsie Mahr (the special nurse) for their valuable assistance.

GEORGE E. PFAHLER,
Director of the X-Ray Department.

REPORT OF THE ELECTRO-THERAPEUTIC DEPARTMENT OF THE MEDICO-CHIRURGICAL HOSPITAL.

This department has been open daily, except Sunday, from 9.30 to 12 A. M.

Last fall the department occupied the new quarters granted last year. All the work has been greatly facilitated by the change, the addition of waiting and dressing rooms being especially appreciated. The static machine has given better service than formerly, doubtless because of the improved hygrometric conditions.

During the past twelve months 3245 treatments were given. Very gratifying results were obtained, particularly in the diathermic treatment of the arthritides, and the high-frequency spark destruction of superficial neoplasms.

The eye department has referred a large number of cases for treatment, and marked relief has been afforded in a wide variety of eye conditions.

The following diseases were treated during the past year:

Alopecia areata,
Amblyopia,
Angioma,
Anterior poliomyelitis,
Arteriosclerosis,
Arthritis,
Arthritis deformans,
Cataract,
Chorio-retinitis,
Choroiditis,
Constipation,
Corneal opacity,
Cyclitis,
Descemitis,
Detached retina,
Diplopia,
Epithelioma,
Glaucoma,
Gout,
Hemiplegia,
Hysteria,
Infections—traumatic,
Iritis,
Lumbago,
Migraine,
Monoplegia,
Neuralgia,
Neurasthenia,
Neuritis,
Nevus pigmentosa,

Optic nerve atrophy,
Optic neuritis,
Paresthesia,
Plumbism,
Retinal hemorrhage,
Retinal hyperæsthesia,
Retinitis,
Rheumatism,
Rheumatoid arthritis,
Sciatica,
Stammering,
Sprain,
Tabes dorsalis,
Traumatism—bruises,
Verruca,
Vitreous opacities.

We extend thanks to the Hospital Staff, Resident Physicians, Superintendent, Nurses, Office Staff, and Physicians of Philadelphia for courtesy they have shown the department, and especially to Miss Elsie Mahr (the special nurse) for her valuable assistance.

WILLIAM T. JOHNSON, M.D.,
Electro-Therapeutist.

GEORGE E. PFAHLER, M.D.,
Director of Electro-Therapeutic Department.

LABORATORIES

CLINICAL MEDICINE

Under the direction of JAMES M. ANDERS, M.D.

Director

WARREN C. BATROFF, M.D.

Chief Assistant

H. LEON JAMESON, M.D.

Assistants

ROBERT WALKER, M.D.

C. G. STEINMETZ, M.D.

The Laboratory of Clinical Medicine is devoted to the study and observation of the medical cases in the Hospital according to the most modern methods.

Scientific examinations are made of the urine, blood, sputum and various excretions and secretions of the body. Accurate records are kept of each case and careful observations made from time to time, thus aiding materially in clearing the diagnosis of obscure cases as well as in treating the patients in the Hospital. Under the direction of Dr. Steinmetz, the necessary laboratory work in connection with patients assigned to members of the senior class in their clinical conferences, is systematically carried forward during the sessions.

REPORT OF THE CLINICAL LABORATORY

Specimens to the number of six thousand nine hundred and sixty-eight (6968) necessary in the diagnosis and observance of the course of the various diseases under treatment were submitted from the various departments for examination, enumerated as follows:

Complete analysis of urine	4,016
Blood counts (complete)	907
Examinations of blood for Coagulability	120
Analysis of Ewald-Boas Test Breakfasts	116
Examinations of sputum for Tubercle Bacilli	210
Estimations of the arterial blood-pressure	1,412
Complete analysis of the feces	70
Miscellaneous secretions:	
from eye	16
from vagina	28
from urethra	22
Serous fluids:	
Pleural	39
Abdominal	12

In addition to the above the members of the Senior class are required to perform under the guidance of the instructor Dr. Steinmetz, the necessary examinations of urine, blood, blood-pressure, etc., from the patients assigned for practical training in diagnosis by the Professor of Medicine. These investigations are made either daily or every second day as the exigencies of the particular case may require.

The laboratory is thus maintained not only for the conduct of routine analyses necessary for the successful examination of patients in the hospital, but also furnishes the opportunity for the practical study of laboratory technique by the students.

We have been benefited by new apparatus as the demands of work required it and by improvement in the system of collecting specimens have been able to furnish more prompt reports.

There has been a moderate increase in the number of specimens examined during the past year owing to the more extended use of laboratory methods in diagnosis by the members of the staff.

In conjunction with the above, special research examinations have been made, in an effort toward furthering scientific knowledge in the study of diseased conditions.

I desire to express my appreciation of the courtesies extended during the year by the Hospital Staff, Resident Physicians, Superintendent, Office Staff and Nurses.

WARREN C. BATROFF, M.D.,
Director.

PATHOLOGY AND BACTERIOLOGY

Pathologist	*Bacteriologist*
JOSEPH H. MCFARLAND, M.D.	J. HAMILTON SMALL, M.D.

During the past year the Hospital and Dispensary Staffs have used the facilities of the Laboratory of Bacteriology to a greater extent than in previous years. We have aimed to return prompt reports, which we make upon special forms, designed to be filed and bound with other reports and charts and case histories, making the permanent records of the Hospital more complete.

We have been prepared to make Wasserman and other tests, requiring the most precise technique, daily.

There have been upon the resident staff, during the past year, three physicians who have had special training in securing and handling blood and other specimens for tests and examinations, having served as laboratory assistants during their student days, this circumstance contributing to promptness and specimens being sent to the laboratory in proper condition, thus facilitating this work.

It is difficult to classify the varied material and specimens submitted for examinations and tests. From our data we select the following: During the year we have made 130 Wasserman reaction tests free of cost to the ward patients of the Hospital. Of these fifty were for patients on the Medical service, twenty on Surgical service, twenty on Nervous diseases service, seven on Opthalmological service, etc. In addition there were handled and reported upon about 200 varied specimens, such as blood cultures, sputum, smears and cultures of many kinds, etc. Personal Bacterins (Autogenous Vaccines) were prepared for many cases and used with gratifying results. All the work of the year has been done at a cost to the Hospital of less than $50.00, which was charged to cover only the actual cost of animals, etc., used.

J. Hamilton Small, Phar.D., M.D.
Bacteriologist.

LABORATORY OF THE DEPARTMENT OF CLINICAL MEDICINE

Under the direction of Judson Daland, M.D.

This laboratory is devoted to a careful and scientific study of all patients entering the service of the Professor of Clinical Medicine, and also all laboratory work in connection with patients assigned to members of the Senior Class in their Clinical Conferences.

Permanent records are made of the examinations of the urine, blood, sputum, feces, gastric contents and secretions of the body. These examinations are invaluable as aids in the diagnosis of obscure diseases, and a necessary guide to the intelligent care and treatment of patients.

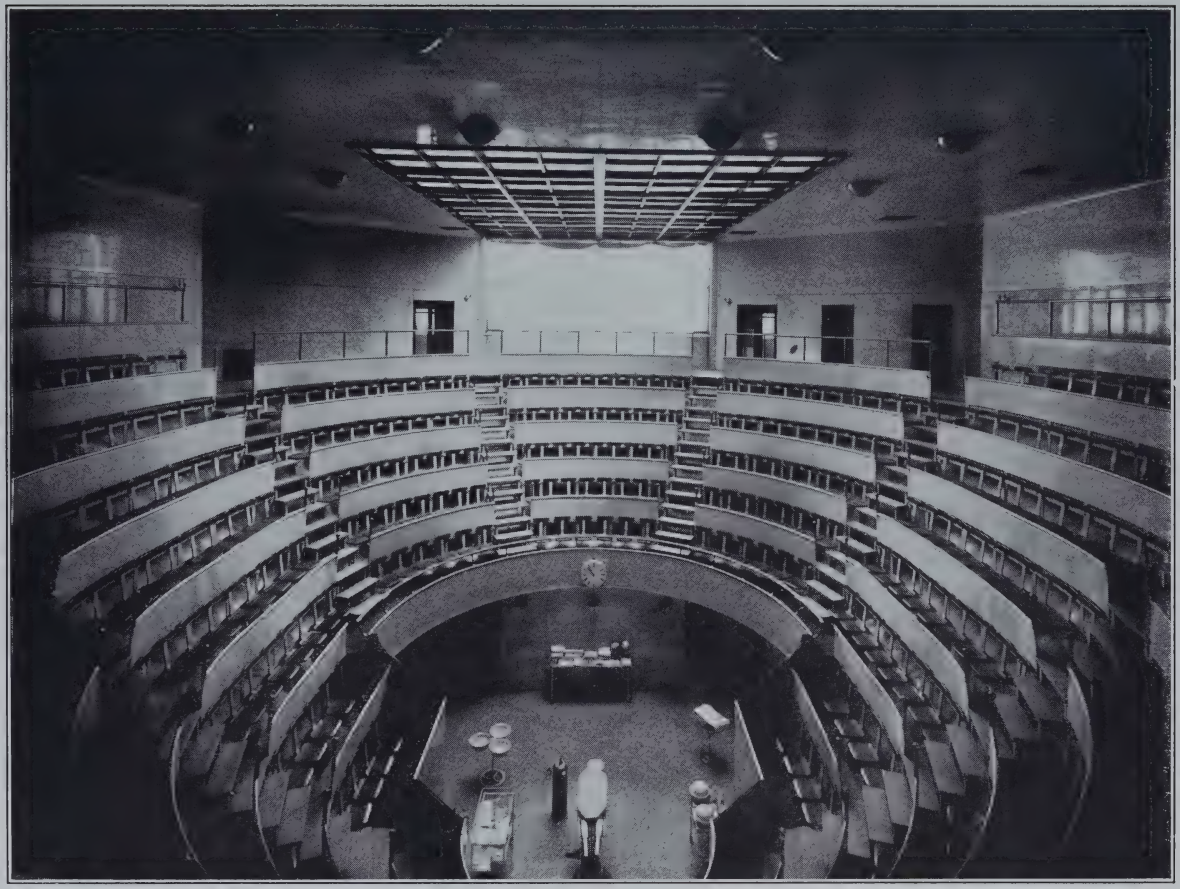

LABORATORY OF NEUROPATHOLOGY

Under the direction of T. H. Weisenburg, M.D.

Assistants

S. D. Ingham, M.D. E. H. Erney, M.D.
P. De Long, M.D. H. Work, M.D.
Josephine C. Frankenberger

The Laboratory of Neuropathology is for the purpose of examining all nervous tissue to determine the cause of nervous and mental diseases. In it is also carried out experimental work to determine if possible their preventative causes. Sections are prepared for the better teaching of this subject to the medical students. The specimens are used for similar purposes.

[CLINICAL AMPHITHEATRE, MEDICO-CHIRURGICAL HOSPITAL

OPERATIONS PERFORMED IN OPHTHALMIC DEPARTMENT

Autropion—
Removing tarsal cartilages 15

Cataract—
Calcareous 2
Congenital 19
Secondary 28
Simple flap operation 57
Fox's flap operation 7
Snellen's flap operation 38
Congenital cataract, iridectomy 2
Conical Cornea, cautery 6
Corneal—
Ulcers, cautery 33
Ulcers, peridectomy 27
Ulcers, peritomy 47
Grafts 8

Dacryocystitis—
Bowman's operation 16
Diabetic Ulcer, Enucleation 1

Ectropion, Ziegler's operation 6
Fox's operation 2
Dianoux operation 2
Entropion, Ziegler operation 16
Enucleation 34
Mule's operation 25
Epithelioma, Fulguration 3

Frontal Sinusitis (Kellean operation) 1
Foreign Bodies, steel, by magnet 16

Glaucoma—
Elliott's operation 31
Fox's operation 36
Van Lint's operation 8

Hordeolum 21
Hernia of iris, suture of cornea 1

Injury of eye ball, sutured 2
Iridectomy 12
Combined with corelysis 5
Iridotomy 10

Keratitis—
Specific 20
Traumatic 3

Lacrymal Cyst—
Punctured 2
Sac, extirpation 9

Pterygium—
Modified McReynolds' 21
Ptosis of lids 2

Remote gold ball implantation 19

Sarcoma, Enucleation 3
Sclerotomy 29
Skin grafting 8
Staphyloma 3
Cornea 2
Strabismus—
Convergent 35
Divergent 22

Tapping of Sclera 13
Tatooing of eye ball 19
Trachoma—
Grattage 95
Burow's operation 13
Traumatic cataract, Saemisch operation 4

Xanthelasma, cautery 1

Cases Treated in the Dental Department

JUNE 1, 1913, TO MAY 31, 1914.

OPERATIVE CLINIC.

Number of patients admitted and treated 1,636

Of this number 465 were absolutely free.

PROSTHETIC CLINIC.

Number of patients admitted and treated 104

CROWN AND BRIDGE.

Number of patients admitted and treated 237

ORAL SURGICAL.

Number of Surgical cases treated 25

Number of patients for extracting 795

Total number of patients admitted 2,797

Report of
The Training School
for Nurses

NURSES' RECEPTION ROOM, MEDICO-CHIRURGICAL HOSPITAL, PHILADELPHIA

REPORT OF
THE TRAINING SCHOOL FOR NURSES

To the President and Members of the Board of Trustees of the Medico-Chirurgical Hospital of the City of Philadelphia:

I herewith submit the Twenty-second Annual Report of the Training School for Nurses for the twelve months ending May 31st, 1914.

The Training School Committee, the Faculty, the Ladies' Aid and our many other friends have been as generous as ever in their support, and we give them our most cordial thanks for all their kindnesses. The entertainments given during this year, especially the Christmas dance, were a great success, and confirm us in our idea that they are a valuable means of furnishing our pupils with pleasure and an opportunity for relaxation.

The general course of instruction for the year has progressed very satisfactorily. The instruction consists of a graded course for three years, consisting of lectures, demonstrations and class recitations, supplemented by practical bedside instruction in caring for the sick and injured. The class recitations and demonstrations are given by the instructress. There is also a course in dietetics and massage, together with practical instruction demanded by the modern development of medicine and surgery.

The graduating class of 1914 numbered twenty-two; quite a number of these have accepted hospital appointments in various parts of the country. The Gold Medal for the highest general average was given to Miss Virginia Brockington. The Mrs. Thomas J. Jeffries Prize, consisting of a complete nurse's traveling outfit, was awarded to Mrs. Frances Leakway for highest efficiency in the Children's Department.

The work of the Social Service Bureau, under the efficient direction of Miss M. Reba Cole, one of our graduates, is developing rapidly; and we look forward to the opening of new departments in connection with this line of work. We hope soon to see a number of our graduates take up this special kind of work.

I wish to thank the physicians and surgeons for the care of the sick nurses, also for the lectures given throughout the year.

The present organization of the School is as follows:

Directress of Nurses	1	
Assistant Directress of Nurses	1	
Dietitian	1	
Graduate Head Nurses	7	
Instructor	1	
Instructor in Massage	1	
Pupils in Senior Class		9
Pupils in Intermediate Class		25
Pupils in Junior Class		22
Probationers		5
Total number of pupils		61
Number of application blanks distributed		410
Number of application blanks received		220
Number of probationers admitted		33
Number of probationers dismissed		2
Number of probationers resigned		4
Number of pupils resigned		7
Number of pupils dismissed		2

Respectfully submitted,

ELIZABETH V. LOBB, R. N.,
Directress of Nurses.

GIFTS TO THE SCHOOL.

Ashton, Dr. W. Easterly	$19.50
Folger, Mr. Walter	1.00

Table and seven chairs.

Graduates of the Training School for Nurses

1893.

Catherine Clendenning—Private nursing.
Catherine Getty—Married.
Rose Deysher—Deceased.

1894.

Louise Seldes—Private nursing.
Minerva Dailey—Married.
Agnes Price—Married.
Katie Sell—Married.

1895.

Anna King.
Adelaide Mackereth—Superintendent, Ancon Hospital, U. S. Army, Panama.
Nellie Culp—Married.
Lizzie Detweiler—Deceased.

Eva Love—Private nursing.
Hettie Dittmar—Private nursing.
Elizabeth Hartman.
Gertrude Gerhard—Private nursing.
Mary Humes—Deceased.
Rebecca Wilson—Deceased.

1896.

Amelia Dady—Private nursing.
Jennie Ledden—Married.
Katherine Hayes—Married.
Anna Morlock—Night Superintendent, Western Pennsylvania Hospital, Pittsburgh, Pa.
Mary Ledden—Ancon Hospital, U. S. Army, Panama.
Leontine Cremarieux—Ancon Hospital, U. S. Army, Panama.
Ellen McConeghy—Deceased.
Margaret Hornby—Married.

1897.

Marie Gerhard—Private nursing.
Katie Martin—Private nursing.
Grace Miller—Married.
Elizabeth Pickering—Married.
Margaret Byrne—Deceased.

1898.

Alice Greenland—Married.
Anna Davis—U. S. Navy, Philadelphia.
Lillian Gordon—Private nursing.
Cora Grubb—Married.
Catherine Derby—Private nursing.
Caresia Oliman—Medical student.

1899.

Sarah McGlinn—Supt., Dr. Noble's Sanatorium, Atlanta, Ga.
Valeria Kinsley—Private nursing.
Sara Groff—Private nursing.
Laura Shellebarger—Head Nurse, Willard Parker Hospital, New York, N. Y.
Mary Consedine—Married.
Margaret Ayres—Private nursing.
Mary Logue—Married.
Helen Parker—Asst. X-Ray Department, Medico-Chirurgical Hospital.

Elizabeth Huplitz—Municipal Hospital, Philadelphia, Pa.
Elizabeth Sollenberger—Married.
Virginia Ashcraft—Married.
Emma McBride—Married.

1900.

Blanche L. Fauble—
Mabel Winthrop—Married.
Nancy Seneca—Superintendent, Rapid City Hospital, Rapid City, South Dakota.
Helen R. Parsons—Married.
Laura G. Peanne—Private nursing.
Edna M. Snider—Deceased.
Susan G. Heitzanrater—Superintendent, Dr. Grube's Private Hospital, Punxsutawney, Pa.

1901.

Margaret Cockett, M. D.—Practicing physician.
M. Reba Cole—Social Service Nurse, Medico-Chirurgical Hospital, Philadelphia, Pa.
Emma L. Magill—Married.
Margaret Baltz—Married.
Elizabeth Kugler—Deceased.
Mary L. Walker—Private nursing.
May H. Bennett—Married.
Agnes Huplitz—Private nursing.

1902.

Ada G. Southgate—Married.
Margaret Houston—Staff Nurse, Medico-Chirurgical Hospital, Philadelphia, Pa.
Elizabeth V. Lobb—Superintendent, Medico-Chirurgical Hospital, Philadelphia, Pa.
Alice Harvey—Married.
Florence M. Schwep—Married.
Jennie M. Ross—Married.
Caroline M. Green—Married.
Theresa Miller—Married.
Margaret B. Godfrey—Married.
Elizabeth C. Moore—Private nursing.
Florence Duval—Married.

1903.

Venetta V. Kahler—Assistant Superintendent, Medico-Chirurgical Hospital, Philadelphia, Pa.
Lillian Klink—Married.
Harriet R. Sample—U. S. Navy Hospital, Philadelphia, Pa.
Margaret Ferguson—Deceased.
Hannah U. Miller—Private nursing.
Elizabeth H. Stewart—Superintendent, General Hospital, Teheran, Persia.
Mary I. Bierstein—Private nursing.
Maude Emery—Married.
Estelle G. Risley—Married.
Elizabeth Dengler—Married.
Daisie Zimmerman—Married.
Eusebia U. Chalfonte—Married.
Mary McConneghy—Married.

1904.

Elizabeth McLaughlin—Private nursing.
Edith V. Kiester—Private nursing.
Beatrice Bowman—Chief Nurse, U.S. Navy Hospital, Norfolk, Va.
Helen H. Madden—Married.
Anna M. Harvey—Private nursing.
Anna M. Wilford—Private nursing.
Birdie P. Gross—Married.
Martha Taylor—Married.
Anna Kutzer—State Dispensary, Harrisburg, Pa.
Ida Swartz—Tubercular nursing, Philadelphia, Pa.
Edna M. Stetson—Married.
Mary A. Doerr—Private nursing.
Estella Erwin—Married.
Emma C. Smith—Medico-Chirurgical Hospital, Instructor, Philadelphia, Pa.
Sarah Peters—Private nursing.
Winifred Evans—Private nursing.
Capitola Suell—Private nursing.

1905.

Kathryn Herr—Married.
Anna Hart—Tubercular nursing, Mont Alto, Pa.
Minnie Worrest—Superintendent of Nurses, Methodist Hospital, Baltimore, Md.
Flavilla Warner—Married.
Alice Conard—Married.
Alma F. Getz—Married.
Clara Leonard—Private nursing.
Emma Camper—Married.
Adelaide Sprenger—Married.
Maude Seaman—Married.
Margaret Leber—Married.
Mary Quinn—Married.
Ida Kurtz—Superintendent, Northwestern General Hospital, Philadelphia, Pa.
Della Fletcher—Married.
Rachel Rambo—Private nursing.
Nellie Fox—Married.
Margaret Clement—Head Nurse, Greenport Hospital, Long Island.
Cecil Cunningham—Married.
Clara Ruth—Superintendent of Nurses, Women's Homeopathic Hospital, Philadelphia, Pa.
Mary Green—Private nursing.

1906.

Frances Mawson—Married.
Martha Anwyl—Private nursing.
Ellnora Ellen Osbaugh—Deceased.
Bessie Catherine Osbaugh—
Bertha B. Mitchell—Private nursing.
Adelaide L. Guthrie—Married.
Jane Guthrie—Settlement Work.
Bessie May Bosworth—Deceased.
Edna Sara Johnson—Private nursing.
Prudence Collins—Married.
Berta Alice Boon—Private nursing.
Julia A. Sweigart—Private nursing.

1907.

Agnes C. Shore—Supt., Phœnixville Hospital, Phœnixville, Pa.
Lulu Detweiler—Married.
Gertrude May Homan—Private nursing.
Estella Brady Powell—Married.
Catherine Cadden—Rockefeller Institute, New York.
Sarah E. Seiwell—Deceased.
Minerva U. Kahler—Married.

1908.

Mary E. Turney—Chief Nurse, Insane Department, Philadelphia General Hospital, Philadelphia, Pa.
Rosette Rice—Married.
Gertrude Smith—Private nursing.
Rose Elizabeth Kelly—Married.
Margaret Mary McGuire—Private nursing.
Sarah Long—Night Head Nurse, Oncologic Hospital, Philadelphia, Pa.
Eunice Ostrum—Married.
Minnie Anna McCreedy—Private nursing.
Ida Kathryn Forster—Married.
Marietta Chase—Married.
Ethel Smith—Married.
Elizabeth A. O'Neil—Superintendent of Nurses, St. Francis Hospital, Poughkeepsie, N. Y.
Elizabeth Isabel McKnight—Private nursing.
Fanny Elizabeth Dibeler—Superintendent of Nurses, Municipal Hospital, Pittsburgh, Pa.

1909.

Mary E. Myers—Married.
Mary A. McLaughlin—Private nursing.

Blanche Hunter—Staff Nurse, Medico-Chirurgical Hospital.
Frances Leakwan—Private nursing.
Anna Robertson—Private nursing.
Viola May Green—Clinic Nurse, Medico-Chirurgical Hospital.
Lila Houck—Operating Room Nurse, Maryland General Hospital, Baltimore, Md.

COLLEGE BUILDINGS OF THE MEDICO-CHIRURGICAL HOSPITAL

The Medico-Chirurgical College

Inasmuch as the Hospital and College are intimately related in so many ways, the friends of the one will be interested to know that the other is maintaining its hitherto excellent record and is making progressive improvement in various directions. The several departments bring together a large enrollment from not only all parts of our own country, but also from many foreign lands, the list of the past session including representatives from Cuba and Porto Rico, Mexico, Central and South America, Germany, Russia, Italy and Persia, and indicating the wide-spread fame of our institution.

Extensive changes and improvements have been made in the college buildings, and we now have, with our hospital facilities, a plant and equipment most admirably fitted for the practical teaching of Medicine and its allied branches, and one surpassed by few in the country. The construction of the new Dispensary has enabled the College to utilize the space formerly occupied by the out-patient departments and by the construction of new offices and additional lecture rooms, quiz rooms, laboratories, etc., greatly to increase the usefulness, comfort and convenience of the college buildings. The College Club has also proved its value and provides a place where all connected with the College can find a good library, wholesome and palatable food, and opportunities for social intercourse and recreation in an agreeable and moral environment, all these being of great value to students away from home.

The record made by our graduates before the various state examining boards throughout the country for several years past has demonstrated that the school ranks among the best in the country and even above some much older and with a more extended reputation. For example, in 1911 the graduates in Medicine of that year passed all state board examinations with no failures, no other college with as many candidates making such a record. Moreover, a very large proportion of the graduates in medicine secure, mainly by competitive examination, positions as resident physicians in other hospitals and institutions, so that whatever of education is given to them through our facilities and equipment extends beyond our walls to benefit a multitude of others.

We trust, therefore, that our friends will appreciate that not the least important of the Hospital's functions is the assistance it gives to the College in the training and developing of skilled and intelligent physicians, dentists, pharmacists and chemists for the future service of the city, state and country, and that they will continue to believe that it is our fullest purpose to maintain an institution of which, in every respect, all may be justly proud.
